Bengaluru, India

PROFESSIONAL SUMMARY

Computer Science and Engineering graduate with a CGPA of 9.19 and strong foundation in Java, Spring Boot, SQL, Data Structures, and Web Development. Hands-on experience in full-stack application development through internship training and academic projects, including e-commerce and AI/ML solutions. Passionate about building scalable software applications and continuously enhancing technical skills.

EDUCATION

B.E. — Computer Science & Engineering — Sai Vidya Institute of Technology, Bengaluru CGPA: 9.19 / 10.0	2022 – 2026
PUC (PCMB) — Bharat Matha PU College, Koppa 85.6%	2020 – 2022
SSLC — Bharat Matha High School, Koppa 89.92%	2019 – 2020

TECHNICAL SKILLS

- Languages:** Java, Python, SQL, JavaScript, HTML, CSS, C (Basics)
- Tools & Frameworks:** Spring Boot, Servlets, JSP, JDBC, Git, Docker, Jenkins, IntelliJ IDEA, VS Code
- Databases:** MySQL, PostgreSQL
- Concepts:** OOP, Data Structures, RESTful API Design, AI/ML Fundamentals, Design Patterns

INTERNSHIP EXPERIENCE

Java Full Stack Development Intern | Tap Academy, Bengaluru (Jan 2026 – Present)

- Completed a 6-month Java Full Stack Development internship covering Core Java, Advanced Java, JDBC, Servlets, JSP, SQL, HTML, CSS, JavaScript, and MySQL.
- Engineered database-driven web applications and implemented CRUD operations.
- Gained practical experience in debugging, testing, database integration, and Git.

PROJECTS

1. Fashion E-Commerce Platform | GitHub Repository

- Developed a full-stack e-commerce application using Java, Servlets, JSP, JDBC, and MySQL.
- Implemented user registration, login authentication, product catalog, shopping cart, and order placement modules.

2. Cardiovascular Disease Prediction through Thermography

- Built a deep learning pipeline combining CNN and VGG19 architectures to predict cardiovascular diseases from facial thermography images.
- Achieved 91.2% accuracy; Deployed a Tkinter-based GUI for real-time, non-invasive diagnosis visualization.

3. Efficient Text Recognition from Scene Images

- Designed a Vision Transformer-based text extraction model achieving ~90% accuracy on real-world images.
- Integrated image preprocessing using OpenCV and built deep learning pipelines with TensorFlow/Keras.

4. Responsive Parallax Nature Exploration Website | GitHub Repository

- Constructed a responsive parallax scrolling website using HTML, CSS, and JavaScript.
- Ensured cross-device compatibility and smooth UI/UX performance across desktop and mobile.

CERTIFICATIONS & TRAINING

- Java Programming Fundamentals — Infosys Springboard
- Artificial Intelligence Fundamentals — IBM SkillsBuild
- GenAI Powered Data Analytics Simulation — TATA Forage
- Software Engineering Simulation — JPMorgan Chase & Co.
- Java & Soft Skills Training — TNS India Foundation (3-month program, 2025) — Covered Java OOP, data structures, and backend principles. Built a Java-MySQL mini project with CRUD operations. Achieved 90%+ evaluation score in technical and professional assessments.
